

ZARIF HAIKAL BIN ZULKEFLEE

Shah Alam, Selangor, Malaysia | zarif0107@icloud.com | cebause.one | linkedin.com/in/zarifhaikalz

PROFESSIONAL SUMMARY

Software developer and AI engineer with hands-on experience in full-stack web development, machine learning, computer vision, and large language model fine-tuning. Bachelor's graduate in Intelligent Systems Engineering from Universiti Teknologi MARA (UiTM). Delivered production systems in healthcare, government, and automation domains using Laravel, MERN stack, Python, and modern AI tooling. Motivated to contribute innovative solutions in software engineering, AI/ML engineering, or full-stack development roles.

WORK EXPERIENCE

AI / Software Engineer

Oct 2025 – Present

GenSE Sdn Bhd · Cyberjaya, Malaysia (Hybrid, Contract)

- Develop AI solutions and software engineering projects for cross-functional teams
- Build full-stack applications using Laravel and the MERN stack (MongoDB, Express, React, Node.js)
- Design and implement AI automation reporting systems using large language models
- Fine-tune LLMs with Unsloth; convert models to GGUF format and deploy locally via Ollama; publish custom models on Hugging Face
- Develop web prototypes and marketing sites for new product initiatives
- Establish and maintain network-attached storage (NAS) infrastructure and in-house hardware

K-Youth Graduate Program — AI & Technology Development

May 2025 – Oct 2025

GenSE Sdn Bhd · Cyberjaya, Malaysia

- Completed intensive graduate program focused on artificial intelligence and modern web technologies
- Gained hands-on experience in HTML5, CSS, JavaScript, and full-stack development practices
- Contributed to AI and software projects under senior engineering mentorship
- Supported system development using Laravel and MERN stack foundations

Information Technology Consultant (Internship — ICT Executive)

Mar 2024 – Jun 2024

Aimstral Sdn Bhd · Kuching, Sarawak, Malaysia

- Developed landing pages and web-based systems using Laravel and PHP
- Assisted mobile application development using Expo Go (React Native)
- Supported network wireframe design using AutoCAD
- Provided IT consulting, technical troubleshooting, and in-house hardware maintenance
- Collaborated with project stakeholders on technology delivery

Web Developer (Internship)

Sep 2021 – Mar 2022

Prosignal Group · Subang Bestari, Malaysia

- Developed and maintained web applications using Wix and standard web technologies
- Built prototypes for new project development initiatives
- Established and administered network-attached storage (NAS) servers
- Maintained in-house hardware and supported day-to-day IT operations

EDUCATION

Bachelor of Information Systems (Honours), Intelligent Systems Engineering

Mar 2022 – Jun 2024

Universiti Teknologi MARA (UiTM), Shah Alam, Selangor · Program CS259 · CGPA: 3.29

- Dean's List Recipient
- Specialization in machine learning, computer vision, and intelligent systems
- Final Year Project: Real-Time Sign Language Translator using YOLOv8

Universiti Teknologi MARA (UiTM), Sungai Petani, Kedah · Program CS110 · CGPA: 3.73

- Vice Chancellor's Award
- Dean's List Recipient
- Strong foundation in programming, databases, and web development

TECHNICAL SKILLS

Programming: Python, JavaScript, PHP, SQL, HTML, CSS, C++, R
Frameworks: Laravel, React, Node.js, Express, Bootstrap, Expo Go, OpenCV, PyTorch, YOLOv8
AI / ML: Unsloth, Ollama, Hugging Face, OpenRouter, Roboflow, Weka, RapidMiner
Databases: Oracle, MySQL, MongoDB
Tools: Docker, Git, GitHub, MATLAB, AutoCAD, Wix, Figma, Adobe Photoshop, Adobe XD, Canva, Microsoft Office
Languages: Malay (Native), English (Intermediate)

SELECTED PROJECTS

iDialysis — Peritoneal Dialysis Patient Management System
Digital healthcare platform for PD patient reporting with AI-powered weekly assessments. Automates patient monitoring and delivers clinical insights to doctors for improved care.
Stack: Laravel, React, Python, MySQL

SDIP — Sistem Digital Inspektorat dan Perundangan
Integrated platform for the Unit of Inspectorate and Legislation, Ministry of Health Malaysia. Supports enforcement operations including audits, investigations, inspections, and notice lifecycle management.
Stack: Laravel, PHP, MySQL, JavaScript

AuraAI — LLM Fine-Tuning & Model Deployment
Fine-tuned large language models using Unsloth for efficient training, converted models to GGUF format, and deployed locally via Ollama. Published custom models on Hugging Face.
Stack: Unsloth, Ollama, Hugging Face, Python

Real-Time Sign Language Translator (Final Year Project)
Real-time sign language translation using YOLOv8 for gesture detection via webcam. Includes custom-trained models, manual data collection, and Roboflow for dataset processing and augmentation.
Stack: YOLOv8, OpenCV, Python, PyTorch, Roboflow

Ditosis — Synthetic Data Solutions
Responsive marketing site for Ditosis, focused on high-quality synthetic datasets for AI training and fine-tuning. Live at ditosis.gense.my.
Stack: HTML, CSS, JavaScript, Node.js

ACHIEVEMENTS

- Vice Chancellor's Award — Diploma in Computer Science, UiTM Sungai Petani (2022)
- Dean's List Recipient — Bachelor of Information Systems (Honours), Intelligent Systems Engineering, UiTM Shah Alam (2024)
- Dean's List Recipient — Diploma in Computer Science, UiTM Sungai Petani
